

# IRPLAST SAFETY AND ENVIRONMENT POLICY

Irplast assigns primary importance to the execution of activities in compliance with safety conditions, environmental protection and laws.

Irplast implements continuous improvement principles with the aim of:

- Obtaining working environment safer and healthier for people
- Searching the best available techniques to obtain higher safety levels for people and environment
- Activating employees training programs to increase their responsibility and competence regarding safety and environment respect.

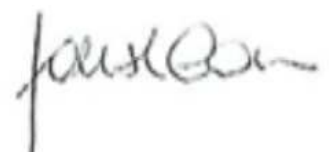

Safety and environment respect have to be considerate integral parts of the work. Everyone in Irplast has to protect safety of the other people and environment from all forms of pollution.

The result obtained regarding safety and environment respect are a Key Performance Indicator of the system efficiency and Irplast management capabilities.

Finally we communicate you that Irplast S.p.A. doesn't engage in employing staff that could be linked in any way to slave labour or human trafficking.
